DATE: 06/19/2020

ADDENDUM NO: 1

BID NO: 2020-10 CCTV Mobile Surveillance Trailers

OPENING DATE: JULY 1, 2020 @ 2:00 PM, CST

Please find the attached information:

Question 1: Page 9, New Solar Surveillance Camera Trailer Transit Security Spec TSP-02-20, Timeline:

The timeline states that delivery must take place within two weeks of bid award and invoicing must take place by June 30th however, the bid deadline is July 1st. Please confirm/clarify expected delivery timeline.

We hope to award and make notifications the week of July 6th. This is a project funded through a homeland security grant that expires in August 2020.

Question 2: Page 9, New Solar Surveillance Camera Trailer Transit Security Spec TSP-02-20, Requirements, Mast:

Is the entire mast assembly required to rotate or can the rotation be limited to only the top portion of the mast where the cameras are mounted?

Rotation of the top portion of the mast is acceptable.

Question 3: Page 10, New Solar Surveillance Camera Trailer Transit Security Spec TSP-02-20, Requirements, Power:

Should bidders take into consideration the power consumption of the optional LED flood lighting when calculating the battery bank capacity required to meet the desired 5-day runtime? If so, how many hours per day are the lights estimated to be in use?

Because the lights are optional, if you include lighting with your bid, please provide two different calculations considering an 10 hour maximum use of the lighting.

Question 4: Page 9, Timeline:

Bid opening is due July 1, with an invoice date of June 30?

We hope to award and make notifications the week of July 6th. This is a project funded through a homeland security grant that expires in August 2020.

Question 5: Delivery two weeks?

Not very much time to build custom unit to their spec's. Can it be longer?

We hope to award and make notifications the week of July 6th. This is a project funded through a homeland security grant that expires in August 2020. If you are unable to make the two-week delivery deadline, please provide your proposed delivery date.

Question 6: Page 10 Power:

We can provide a 12 Vdc system: 520W solar panel array with 1500AH battery bank or 24Vdc system 600W solar panel array and 750AH battery bank. Which would be preferred?

MTS is looking for the maximum amount of time for battery power based on possible long-term usage during all seasons in Wisconsin. It is required that there is 120V plug-in shore power and at least a 1200Ah Battery Package.

Question 7: Page 10 Cameras:

Cameras are warranted to be left on the trailer during towing, continual removal can cause more damage to cameras / wiring than leaving on the trailer. Is this OK?

Yes, this is acceptable.

BID NO: 2020-10
